PROFESSIONAL SUMMARY

MSc in Computer Science (AI and Automation) with experience delivering data pipelines and full stack systems built on live production databases. Identified a capacity planning gap at Outokumpu, pitched the project, and executed it from planning through delivery, integrating machine learning forecasts into the company's Power BI for daily planning decisions. Experienced in cross functional collaboration, data driven decision making, and systems analysis through roles at Dagab, Matsmart Motatos, and as Event Coordinator for an international student organization. Consistently driven to deliver sustainable, efficient, and scalable business outcomes.

EDUCATION

Örebro University

Master of Science in Computer Science, Artificial Intelligence and Automation

Specialization in autonomous systems, machine learning, and industrial automation with a focus on deploying intelligent systems in production environments.

University of Zaragoza

Exchange Master's Student, Computer Science

Örebro, Sweden

Aug 2021 – Jun 2026

Zaragoza, Spain

Sep 2025 – Jan 2026

WORK EXPERIENCE

Outokumpu

Master's Thesis, Data Engineering & Machine Learning

Degerfors, Sweden

Jan 2026 – Jun 2026

- Identified a capacity planning gap, pitched the project to Outokumpu, and led planning and coordination.
- Mapped an undocumented 17 table production database by tracing records against the physical process on site.
- Built an automated Python and SQL pipeline consolidating fragmented source systems into one reliable dataset.
- Collaborated with technical and non technical stakeholders to validate assumptions and ensure forecasts stayed operationally realistic.
- Analysed model performance across three validation strategies, identifying limitations and prioritising the most accurate approach.
- Delivered forecasts into Outokumpu's Power BI, now driving daily capacity decisions (± 35 min, R^2 0.955).

Välkommen Bil AB

Freelance Developer / Consultant

Stockholm, Sweden

May 2022 – Jan 2023

- Owned the project end to end, gathering requirements from the client and replacing manual stock tracking with a full-stack inventory system (Django REST, React, PostgreSQL).
- Designed an automated valuation tool that matches vehicle lookups against comparable records, supporting faster and more consistent pricing decisions.
- Packaged the solution with Docker Compose and delivered clear documentation and handover, ensuring the client could operate the system independently.

Örebro University

Teaching Assistant

Örebro, Sweden

2024 – 2025

- Planned and delivered sessions for classes of 25 to 30 students, translating complex course material into practical guidance for hands on assignments.
- Led teaching and support in computer architecture, assembly, memory systems and C programming, applying structured problem solving to help students resolve errors and complete demanding assignments.
- Evaluated and graded student submissions against course criteria, giving feedback on design, testing and documentation, and collaborated with course staff on consistent assessment.

Dagab AB

Logistics Assistant

Örebro, Sweden

Mar 2025 – Aug 2025

- Coordinated the full order flow intake, picking, dispatch and delivery follow-up and resolved discrepancies with suppliers and internal teams.
- Ran regular stock counts to keep inventory data accurate, and scheduled internal transport so production and pick areas stayed supplied.

Matsmart-Motatos

Machine Operator

Örebro, Sweden

May 2021 – Jun 2024

- Set up, ran and serviced production lines, troubleshooting stoppages to keep throughput on schedule.
- Inspected output against quality standards and tracked material stock so daily production targets were met without shortages.
- Upheld compliance with production standards and safety regulations on a daily basis

SKILLS

Languages: Python, SQL, Bash, C/C++, Java

Databases: PostgreSQL, SQL Server, relational modelling, indexing, query optimisation

Data & ML: ETL pipelines, feature engineering, pandas, scikit-learn, XGBoost, Power BI

Backend & APIs: Django REST Framework, REST APIs, third-party integrations, React, TypeScript

Related technologies: Linux, Docker, Git/GitHub, Apache Kafka, Kubernetes, Creo Parametric (CAD), Autodesk Revit (BIM), MATLAB, Python, Siemens Plant Simulation, Azure, Terraform

Spoken languages: Swedish (fluent), English (fluent), Arabic

ACTIVITIES

Erasmus Student Network (ESN), Örebro University

Örebro, Sweden

Student Ambassador & Mentor

Dec 2023 – May 2025

- Organised and led networking activities and social events for incoming international students.

Nexus Student Organization, Örebro University

Örebro, Sweden

Event Coordinator

Dec 2024 – May 2025

- Planned and coordinated student events, managing logistics and ensuring smooth execution.
